Preface

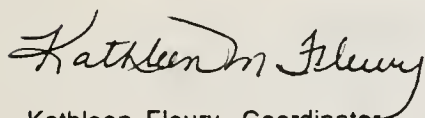

I am honored to present the updated version of the "*Profile of the Montana Native American*." It is my hope that it will serve as an invaluable reference for Native Americans and others who work and walk with us.

The information has been gathered from various sources. Should you need clarification on specific data, the name of the originator has been included for your information. Addresses are included in the "Appendix".

Martin J. Callahan and Garrett Big Leggings, Interns for the Office of the Coordinator of Indian Affairs, spent many hours compiling the material. Their efforts are most appreciated.

Funding has been provided by the Native American Studies Center, Montana State University, The Governor's Council on Aging, and the Montana Department of Transportation. Special thanks are due to Wayne Stein, Charlie Rehbein and Ray Brown who made this possible.

I also express my appreciation to the many other persons who contributed to this work.

Kathleen Fleury, Coordinator

Office of Indian Affairs

Helena, Montana

September 1, 1994

* -"Total Persons" is the number of persons for whom poverty status is determined by the Census Bureau, and is not necessarily the total population of the reservation.

** -BPL: Below Poverty Level

Note: The criteria for determining Poverty Level by the Census Bureau is based on Monetary Imputative Income, which does not take into account any additional benefits or other non-regular income, regardless of source, which may include any of the following: Housing Allowances, Food Allowances, Medical Coverage, Educational Subsidies or other Grants or Endowments. [Source: *American Public Radio News*, Report on Indian Poverty, November 13, 1992, in reference to the Census Bureau's 1990 poverty statistics.]

Wisconsin	1,854	2,846	5,647	4,115	30%	4,698	45%	2,997	35%

Note:

As defined by the Bureau of Labor and Statistics (BLS), the "potential labor force" is comprised of all individuals 16 years old and over, excluding students and those who either must care for children, are retired, or are disabled. Thus, out of 669,635 eligible individuals, the "potential workforce" is comprised of 567,150 individuals, both of employed and unemployed. This represents an increase in the labor force of 121,788 individuals compared to the 1989 report. Only 25% of the age 16 and over population earn over \$7,000 annually. This is only 1% higher than that in the previous reporting period, although the number of individuals earning in excess of \$7,000 has increased only by 6,373 since the last reporting period. Of the "potential" work force, 45% are not employed. There has been a slight change of 3% in this group since the last reporting period. Although 239,1799 Indians are unemployed, only 155,380 are actively seeking work, and those who have no available work elsewhere. These individuals are omitted from the standard Bureau of Labor Statistics' definitions of "labor force" and "unemployed". Therefore, by BLS definition, the Indian labor force consists of only those 394,559 individuals reported in columns (G) and (I), and the total Indian population unemployment rate is 45%. This is approximately 37% higher than the average unemployment rate for the United States.

Percentage Proportions of Select Industries
and Occupations by Reservation
(page 1 of 8)

Note: Use the following Keys to identify the Industries and Occupations charted in the following pages of this table.

Key to Industries

-
- A - Agriculture, forestry, and fisheries
 - B - Mining
 - C - Construction
 - D - Manufacturing, nondurable goods
 - E - Manufacturing, durable goods
 - F - Transportation
 - G - Communications and other public utilities
 - H - Wholesale trade
 - I - Retail trade
 - J - Finance, insurance, and real estate
 - K - Business and repair services
 - L - Personal services
 - M - Entertainment and recreation services
 - N - Health services
 - O - Education services
 - P - Other professional and related services
 - Q - Public administration
 - X - All others combined

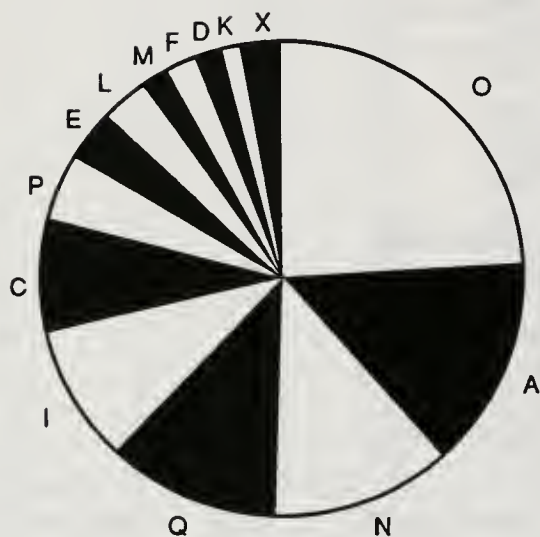

Key to Occupations

-
- a- Executive, administrative, and managerial occupations
 - b- Professional specialty occupations
 - c- Technicians and related support occupations
 - d- Sales occupations
 - e- Administrative support occupations, including clerical
 - f- Private household occupations
 - g- Protective service occupations
 - h- Service occupations, except protective and household
 - i- Farming, forestry, and fishing occupations
 - j- Precision production, craft and repair occupations
 - k- Machine operators, assemblers, and inspectors
 - l- Transportation and material moving occupations
 - m- Handlers, equipment cleaners, helpers, and laborers
 - x- All others combined

Number and percentage of HIV antibody tests and positive tests by Montana Indian and total state population as performed by the Montana Public Health Lab

	1989		1990		1991	
	HIV Testing Results Number of Tests	Number of Positive Tests	HIV Testing Results Number of Tests	Number of Positive Tests	HIV Testing Results Number of Tests	Number of Positive Tests
Montana Indian	105	0	286	3	394	3
State Total	5058	61	5783	40	7864	51
Indian % of Total	2.08%	0.00%	4.95%	7.50%	5.01%	5.88%

Note -

In Montana, 5.9% of the population is identified as Native American, yet in 1989, for those tests where race has been indicated, the percentage of total tests for Native Americans is significantly lower. In 1990 and 1991, there were increases in the percentages of total tests for Native Americans. This may reflect better data collection as the result of the addition of IHS as a testing site on the HIV request form.

Native American adult/adolescent AIDS cases by sex & exposure category, reported through March 1992, for the entire United States
(page 1 of 2)

Notes -

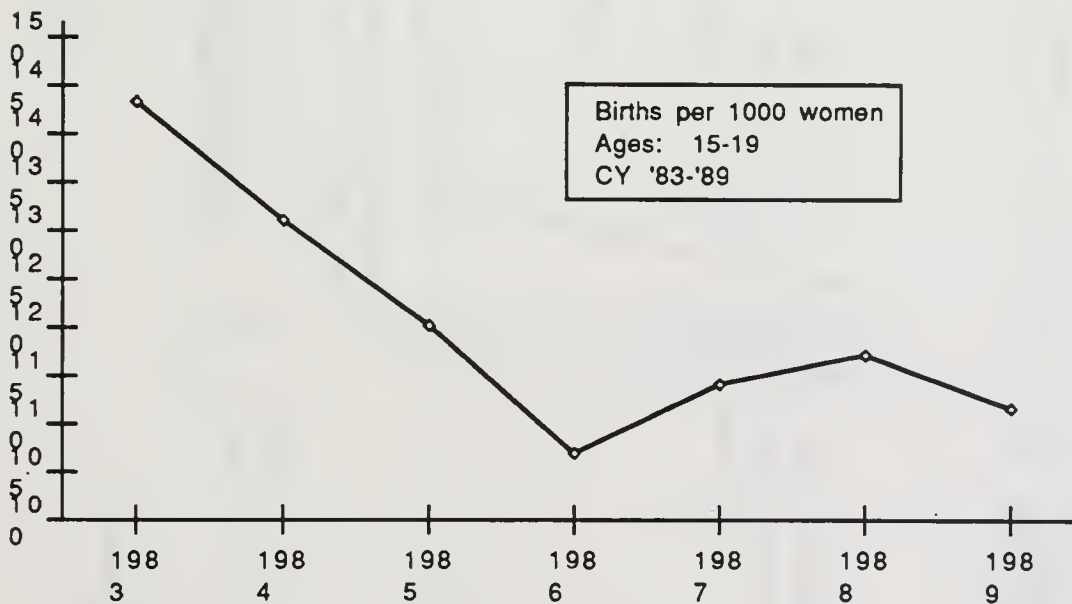

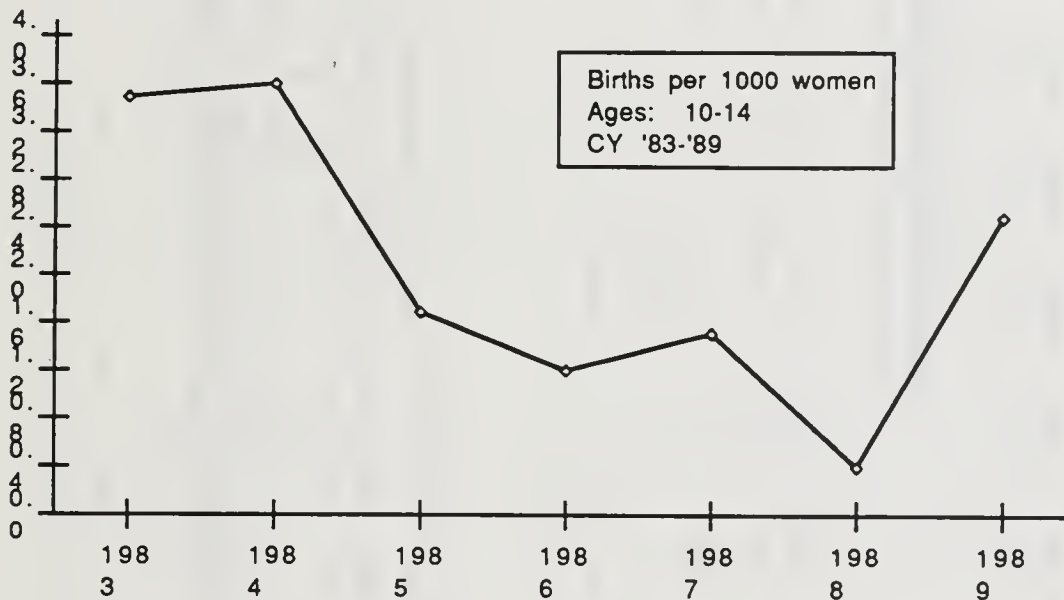

- * - Eighteen adults/adolescents and 2 children developed AIDS after receiving blood screened negative for HIV antibody. Five additional adults developed AIDS after receiving tissue or organs from HIV-infected donors. Two of the 5 received tissue or organs from a donor who was negative for HIV antibody at the time of donation
- ** - "Other" refers to 3 health-care workers who developed AIDS after occupational exposure to HIV-infected blood, as documented by evidence of seroconversion; and to 2 patients who developed AIDS after exposure to HIV within the health-care setting, as documented by laboratory studies. "Undetermined" refers to patients whose mode of exposure to HIV remains undetermined after investigation.

Montana's
Mobile Home Density
by County

This map shows the percentage of housing in each county in Montana accounted for by mobile homes. Most mobile, or "manufactured," houses remain stationary after being shipped from the factory, and 39 percent nationally are located on the owner's property. Since 1970, the number of such homes in the United States has increased 230 percent. According to American Demographics, the average mobile home cost \$27,800 in 1990, about a fifth of the average price of a site-built home.

U.S. average is 7.24 %

Native American Veterans
Receiving Monetary Benefits
from VA

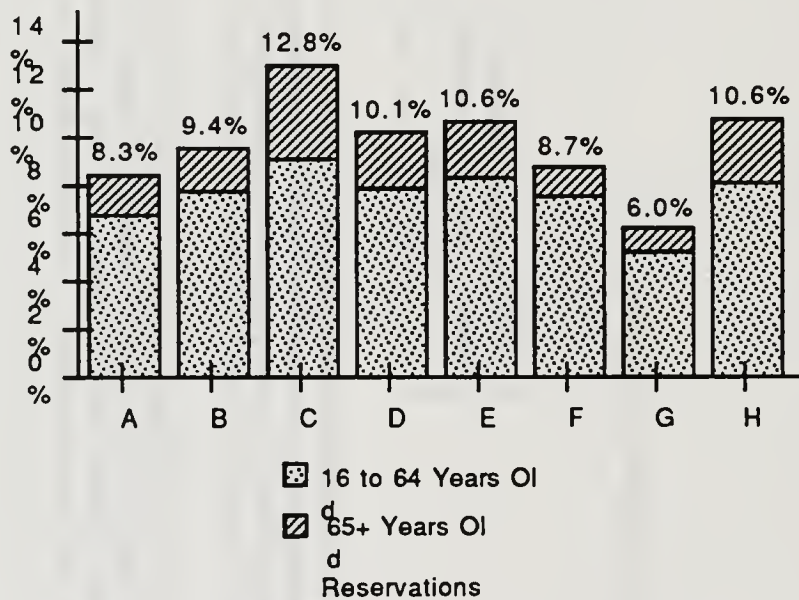

- * - From the data that the VA at Fort Harrison was able to collect, there are approximately 8,400 Native American Veterans living in the state of Montana. If statistical averages are the same for the Native American Veterans as they are for the general veteran population, approximately 850 Native American Veterans are receiving monetary benefits from VA.

Note - The data provided is only an estimate, based on information the VA at Ft. Harrison receives. VA does not track the veteran population unless they seek services from VA. The data would also be skewed by the number of Native American Veterans not living on reservations and those who do not have traditional native American names or who are not enrolled in a recognized tribe in the state.
